

STB

SPECIALISED TILT-BED. The many aspects of STB trailers create a highly developed range of products for the transportation of specialist plant and equipment. Unique features enable the loading of the likes of scissor lifts, specialised tracked equipment, wood chippers, industrial floor scrubbing machinery etc. Small wheels, the lowest ground clearance, very high point loads and sensitive weight bias can all be accommodated within the options this range provides.

Within the environment in which STB trailers work, robustness and durability are of paramount importance to operators. For that reason STB trailers feature many standard items to prolong the life cycle. Features such as 3mm plate steel mudguards, Supergrip deck options, fully supported bed and well protected lighting have proven popular in the five years since production began.

Standard features

Spare wheel
Supplied as standard. Fitted to an easily accessible bracket.

Alu loading panel
Light and strong extruded HD aluminium section forms the main part of loading panel

Track stop bar
Adjustable in position front to rear, a handy way of ensuring machines are correctly loaded

HD 3mm steel guards
STB trailers have robust mudguards with anti-slip step surface finish

Protected lighting
Well protected inside a robust steel cage the lights on STB are safe from damage

Hydraulic operation
Quick and easy operation with a powerful hydraulic pump and reliable ram

Options

'Blade' double-panel
Designed to enable even the smallest wheels to run up from ground level. Strong and durable

Accessories
A HD bucket rest for digger plant. Manual or electric winches for easy loading

Supergrip deck track
Galvanised punched steel. The ultimate in grip and durability. Impossible to slip on for machinery or operators

Storage box
Convenient and secure place to keep all ratchet straps or small tools for the job
